Some of the most pressing issues of our time concern the complex relationships between people and the environment, and UTSA’s Department of Anthropology is committed to understanding them. Our M.A. and Ph.D. programs join a focus on environmental anthropology with a broad education across anthropology’s sub-fields and training for both academic and applied careers.

Research Strengths
- The archaeology of long-term social & environmental change
- Cultural & biological anthropology of environment, health, & development
- Primate ecology
- Conservation biology, policy, & practice

Geographical Specialties
- The United States & Mexico
- Andean & Lowland South America
- Mesoamerica & the Caribbean
- The Arctic North
- East & South Africa
- Southeast Asia
- The Island Pacific

Funding Support
- Fellowships
- Scholarships
- Teaching & research assistantships
- Travel & research grants
- Collaboration in seeking external funding

PhD deadlines: November 1 for consideration for university funding, and February 1 for consideration for departmental funding. For further information visit: www.colfa.utsa.edu/ant/
