# Bachelor of Science in Anthropology and Human Biology

## Emory University Department of Anthropology

The Bachelor of Science in Anthropology & Human Biology provides a strong foundation for understanding behavior, biology, and health through an anthropological lens. Pulling from the sub-disciplines of archaeology and biological anthropology, the BS major offers both an alternative path to the pre-medical curriculum and an interdisciplinary approach to research.

The Department of Anthropology believes that a holistic understanding of what it means to be human is critical for future physicians and scientists. The BS major offers valuable benefits to undergraduate students interested in pursuing pre-medical studies or other STEM careers: a deep understanding of human biology and evolution, interdisciplinary approaches and research skills, and humanistic perspectives.

### Statement of Requirements

A Bachelor of Science degree in Anthropology requires a minimum of 10 Anthropology courses of at least 3 credits each (30+ credit hours) and 5 Foundation courses (23+ credit hours), with a minimum of a C average in the major. A maximum combined total of 8 hours of ANT 397R (Directed Readings), ANT 495 (Honors), and ANT 497R (Undergraduate Research) may be applied to the major. Only one 100-level class may be taken to fulfill the elective requirements. No courses taken using the S/U option may be applied to the major. A maximum of 12 credit hours earned off the Emory campus may be applied toward the major. A maximum of 2 courses may double-count for both the Anthropology and Human Biology BS and another major or minor (this limit does not apply to foundation courses earned outside the department).

Note: Petitions for course substitutions and exceptions will be considered by the Anthropology Undergraduate Concerns Committee. *A.P./Transfer credit* for math, science, and statistics foundations is accepted if it has already been approved by the appropriate department and appears on the transcript.

See reverse side of form for required courses.

### Anthropology Requirements Earned Off Campus

(Maximum is 12 credit hours of approved coursework, including study abroad. Courses must be at least 3 credits each. This limit does not apply to foundation courses earned outside the department.)
